PROFILE

Learning Never Stops! With this Moto in my life I believe that one should keep on walking ahead and should be open to learning new things and sharpen the skills more and more. I look forward to establish myself in the industry as a person known for getting to the root of of every problem and eliminating the issues.

In the meanwhile I am also open to learn new languages and technologies as learning new things have been catching my eye since I started writing Code. I am also motivated to innovate and develop things as well as modify existing for the betterment of the whole system.

EDUCATION

Gujarat Technological University   Ahmedabad, Gujarat

Integrated(Bachelors + Masters) Masters of Computer Application   2018[Expected]

Gujarat Secondary & Higher Secondary Education Board   Gandhinagar, Gujarat

TECHNICAL SKILLS

Operating: Systems: Linux, Macintosh and Windows.

Languages : Python, C++, C, Java, R, HTML, JavaScript.

Databases: Oracle, MongoDB

PROJECTS

Python

EVE Framework & Django Framework

Learnt and deployed RESTful Web services on Cloud, using Eve Python Framework and MongoDB. Also implemented securing Hashing of secret key used to authenticate the client.

C, C++, Java

Successfully completed semester project during college by using HTML5 / CSS3 / JQuery, C, C++ and Java. The projects were WebPortal running locally, Games, Management Systems.

Cloud Platform

I have successfully coded and pushed projects using Compute Engine, App Engine as well Cloud SQL by using FrontEnd technologies like HTML, Polymer JavaScript and FireBase as well as Python in the backend.

Octopress

Octopress is a static blogging framework built on top of Jekyll. It uses scripts to build static files to be deployed to a server. My Blog is made using Octopress by me.

Wordpress

I have developed various websites for personal use as well as a freelancer for commercial purpose using WordPress as per the client's requirements.

ACHIEVEMENTS

Google Developers Group, Baroda [GDG Baroda]

Cloud Developer

GDG Baroda is the official local user group of Google Inc. By getting involved in the community I educate people about Cloud and how various technologies and Cloud walks together.

Python Developers Baroda [PyDev Baroda]

Organiser

Python Developers Baroda is the Official Local User Group of the Python Software Foundation in Vadodara,Gujarat, India . We work as a community in spreading the knowledge of Python and educate people about the same.

TechTalks

I have delivered talks at several reputed Conferences as well as at reputed colleges of Gujarat which includes *Google DevFest* by GDG Baroda, *Parul University*, *A.D Patel Institute of Technology, Babaria Educational Campus, Gujarat Technological University*.

Workshops

I have conducted several workshops for Python ranging from Beginner to Intermediate Level as well as *Google Cloud Platform, Google Polymer and WordPress*.
